

SOLAR GARDEN LIGHT

USER'S MANUAL

Instruction Manual For Solar Garden Light

Solar Garden Light is a green and environment-friendly product. The light is powered by solar energy through solar panel. The solar panel converts sunlight into electric energy and then charges built-in "AA" Ni-Cd rechargeable battery during the day. A light sensor turns on the light automatically at night.

The light shall be installed in a place where the best sunlight can be located and the surface of the solar panel shall be placed in the best direction in order to accept the maximum sunlight. The light source is super bright LED which can work up to 8 hours at night after a full sunny day charging.

1. Diagram and Introduction

The light is weather-proof and contains the parts as shown in (diagram a)

2. Installation Instruction

Please carefully read the manual and then install the solar garden light accordingly.

- (1) Remove carefully the main body and mounting stakes from inner box;
- (2) Turn the transparent cover clockwise and take it away. (diagram b);
- (3) Remove the battery isolating tab before using (diagram c);
- (4) Join the transparent cover and top cover lightly, push the transparent cover in and turn it anti-clockwise to tighten it. (diagram d);

Diagram b

Diagram c

Diagram d

- (5) Connect the mounting stakes and insert the sharp point mounting stake into the ground deep enough to hold the light firmly. Then place the main body on the top of mounting stake. (diagram e);

3. Precautions

- (1) Do not touch the surface of the top of the solar light;
- (2) You can check the operation of the light by simply covering the upper surface of the solar panel completely to activate the light sensor;
- (3) Remember that the light is designed to work when it is dark. If there's high ambient lighting nearby, then the LED light may be very dim or not turned on at all;

Diagram e

- (4) Although the battery has been charged by the manufacturer, the electric level will have been probably dropped when you receive it. Please charge it for a full day to realize maximum performance.

4. Replacing the battery

If the light stops working after being used for a long time, maybe the battery is beyond its lifespan. You can take off the light and loosen the battery lid, then change new rechargeable battery. (battery specification: 1.2V Ni-Cd battery).

5. Remark

The lifetime of LED lamp is over 100,000 hours. You never need to change it.

DECLARATION OF CONFORMITY

We, The Importer, Rolson Tools Ltd. Declare That The Product Listed Here Is In Conformity With The Following References To The Specification Under Which Conformity Is Declared.

60695 Solar Garden Light
